

BPO: Broker Price Opinions

Each BPO is human-reviewed and subject to rigorous, technology-driven quality controls—providing a value beyond just price.

Overview

Clear Capital provides the highest quality Broker Price Opinions (BPOs) available. These data- and image-rich reports provide a clear understanding of the subject property for confident investment decisions.

No matter the direction of the market, accuracy is essential. You need to know with a high level of confidence that the valuations you receive are supported and credible. And customers have come to know that Clear Capital delivers the highest quality BPOs on the market.

As soon as the BPO is ordered, we immediately get to work resolving complex address issues by validating, standardizing and geo-coding each address. We apply two levels of technology-driven quality assurance, data validation and our quality control rules engine, to identify duplicates and bring data together helping our internal valuation professionals make accurate review decisions. Each BPO is reviewed by staff analysts prior to delivery for the highest quality assurance.

It's these efforts, and much more, that produce our standard-setting BPO product.

Key Benefits
